Dear Sir/Madam,

For preparing your final paper to publish in **TELKOMNIKA (Telecommunication, Computing, Electronics and Control) ISSN: 1693-6930, e-ISSN: 2302-9293 Issue December 2018.** Please revise your paper based on the comment on the paper. **You have 1 day to revise your paper until November 20, 2018**. Please revise in the paper that attached in this email and don't make another file. We hope your response soon. Thank you.

Best regards,
TELKOMNIKA Staff

Dear Sir/Madam,

Your email has reached my queues safely, so i will get back in touch with you there as soon as i can. Just a heads up i might not get back to you straight away, as i answer all emails in order to keep things fair.

How to submit your manuscript
To make a submission, you must have a user account and be enrolled as an Author. User accounts can either be created by the Journal Manager or you can register yourself (this journal policy allow you create user account by your self as a Reader, an Author and/or a Reviewer). All fields with an asterisk beside them (Username; Password; Repeat Password; First Name; Last Name; Email) are mandatory. Your username and your email address must be unique; furthermore, while you can change your email address at a later date, you will be unable to change your username. If you want to register in another role within the same journal (for example, if you are already a Reader, but also want to become an Author) you can log in; go to Edit My Profile (under My Account on your User Home page); and check off the checkboxes next to any available roles, near the bottom of the page. Once you have an account, log in to the journal site and select the role of Author. The Author is asked to upload a submission file and to provide metadata or indexing information. (The metadata improves the search capacity for research online and for the journal.) The Author can upload Supplementary Files, in the form of data sets, research instruments, or source texts that will enrich the item, as well as contribute to more open and robust forms of research and scholarship.

Your paper ID?
Please ALWAYS put your paper ID number in the subject line of email communication when making inquiries. For example, if your submitted manuscript
URL: http://journal.uad.ac.id/index.php/TELKOMNIKA/author/submission/1234, your paper ID number is 1234.

Your cooperation is very appreciated.

Thank you

Best Regards,
Tole Sutikno

Hi there,
Thank your for your information regarding our Paper revision.
Actually, we are happy to revise our paper to getting better but it is impossible to revise it in one day. This is because I am on the way right now. It is ok, please give us more days to fix the paper and we will email it as soon as possible.

If you dont mind please send your mobile to get rapid response from you or please WA to +6281273691390

Thanks

Darius antoni

TELKOMNIKA 2018
RESPONSE TO MENTOR(S) COMMENTS

ID Paper	**:**	**9883**
Tittle	**:**	The Readiness of Palm Oil Industry in Enterprise Resource Planning
Authors	**:**	Darius Antoni, Deni Fikari, Muhammad Akbar, Ferry Jie

ABSTRACT

1. Mentor's Comment #1 :

   The order of keywords should be *Critical Success Factor, ERP, Palm Oil, Readiness*
   Respond to Comment #1:done

2. Mentor's Comment #2 :

   Check spelling errors in the paper, for example *requireda*(should be "required")
   Respond to Comment #2: Done

3. Mentor's Comment #3 :

   Benefit of the contribution (examining the readiness of palm oil industry) is not clear.
   Respond to Comment #3 :Done

4. Mentor's Comment #4 :

   What is the parameter to determine palm oil industry is well prepared to implement ERP from four dimensions?
   Respond to Comment #4: The Abstract already revised by adding the significant factors that influence the readiness of Palm Oil Industry

INTRODUCTIONS

5. Mentor's Comment #5 :

   Check spelling errors in the paper, for example *descritive*(should be "descriptive")
   Respond to Comment #5: done

6. Mentor's Comment #6 :

   This paper should explain clearly why examining the readiness of palm oil industry is needed
   Respond to Comment #6: The Problem Statement already mentioned in paragraph 4,5 and 6.

There are a number of studies has been conducted to evaluate the readiness of the ERP implementation from various perspectives such as Abdinnour-Helm, et al. [8]investigatedthe readiness of human resources in ERP implementation. Abdolvand, et al. [9] conducted an assessment on the readiness indicators that are determined based on the critical success and failure factors including egalitarian leadership, collaborative working environment, top management commitment, supportive management, and use of information technology. Raymond, et al. [10] conducted an analysis to develop the concept of ERP implementation in smal-medium sized enterprises through four dimensions including the

organizational context, external forces, and perception of ERP and business processes. Ahmadi, et al. [11] developed a novel approach to assess readiness model for managing the interrelation degree among activities within organizations. Ram, et al. [12] examined the organizational readiness is associated with four critical success factors including project management, business process re-engineering, training and education and system integration, to achieve effective ERP implementation in organizations.

Although a few of these studies attempted to assess the readiness of organizations in implementation of ERP, they are mainly descriptive surveys. They are based on limited cases of human resources, leadership, management supports and business processes. There is thus a lack and provide empirical evidence based on organization resources including management, process, technology, data and human resources using gap analysis.

Moreover, the majority of the above studies are predominantly based on the readiness of general organizations in implementing ERP. There remains little research on readiness of palm oil organizations or companies. Importantly, the readiness of palm oil companies can be more complex than other organizations due to the absesnce of management, process, technology, data and human resources.

Thus, this research aims to examine the ERP implementation readiness using the critical success factors (CSF). The aggregated CSFs are classified into five groups that is management, processes, technology, data and human resources. Assessing these factors measures the readiness of ERP Implementation. This research investigated the readiness through conducting a survey in four companies in the sector of the palm oil industry within the scope of Banyuasinregency and MusiBanyuasinregency of South Sumatra province, Indonesia.

7. Mentor's Comment #7 :
   Based on the abstract, there are three methods: CSF method, a survey method, and a gap analysis. However, only CSF method is described clearly in IntroductionRespond to Comment #7: done.
   Thus, this research aims to examine the ERP implementation readiness usingquantitative method, the critical success factors (CSF) and a gap analysis. Quantitative method is used to obtain data through survey using closed-ended questionnaire that is developed from prior studies.The aggregated CSFs are classified into five groups that is management, processes, technology, data and human resources. Assessing these factors measures the readiness of ERP Implementation. This research investigated the readiness through conducting a survey in four companies in the sector of the palm oil industry within the scope of Banyuasinregency and MusiBanyuasinregency of South Sumatra province, Indonesia

8. Mentor's Comment #8 :
   Don't only mention figures or tables in the paragraph. All figures and tables should be referenced in the paragraph.
   Respond to Comment #8: done

RESULT AND DISCUSSION
1. Mentor's Comment #9 :
   All variables in Tables must be explained. For example, what is *SA, A,* and *M* in Table 9? (If variables are explained in other section, please mention that section).
   Respond to Comment #1: already explained in section 2.2

2. Mentor's Comment #10 :
3. How to obtain the predicted data that is shown in Table 8?
   Respond to Comment #10: it has explained in section 3.1 and table 3

CONCLUSION

4. Mentor's Comment #11 :
5. The last paragraph of conclusion (the difference between companies with or without ERP can be seen based on the gap value) is not correct, because it is not supported by the experimental result.
   Respond to Comment #11 : That statement already deleted from conclusion

6. Mentor's Comment #12 :
   Give the future research that is related with the topic of this research in the conclusion
   Respond to Comment #4: the future research have been added in the conclusion of research section
